

**Yugma SE (For Skype)** is a Powerful Skype App that builds upon Skype's offerings by adding instant desktop sharing and collaboration functionality.

Skype users can instantly begin sharing their computer screen with anyone, anywhere - regardless of the application, software or operating system - with Yugma SE. Yugma's integrated functionality makes it easy for Skype users to instantly web conference with their Skype contacts or non-Skype contacts.

Once Yugma SE is installed, it automatically recognizes your Skype Name and allows you to instantly Host or Join a Yugma meeting. You don't need to register for a Yugma account to use Yugma SE. Whether you are hosting or joining a Yugma web meeting, you can easily invite a friend or colleague from your existing Skype contact list.

Teaming up Skype with Yugma SE (For Skype) gives you all the tools needed to accomplish any task required in a traditional, face-to-face meeting.

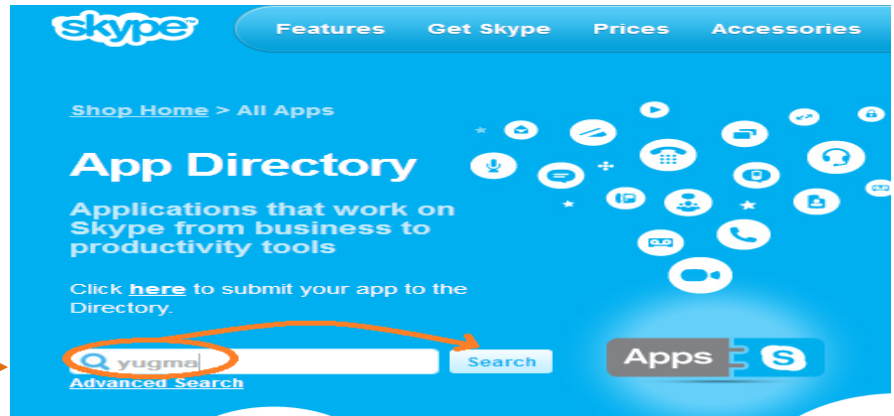

## Mac user instructions

### Get Yugma SE (from Skype Apps)

The Yugma SE (For Skype) is a Skype Certified Extra that builds upon Skype's offering by adding instant desktop sharing and collaboration functionality. Skype users can instantly begin sharing their computer screen with anyone, anywhere - regardless of the application, software or operating system - with Yugma SE. Yugma's integrated functionality makes it easy for Skype users to instantly web conference with their Skype contacts or non-Skype contacts. Once Yugma SE is installed, it automatically recognizes your Skype Name and allows you to instantly Host or Join a Yugma Skype meeting. You don't need to register for a Yugma account to use Yugma Skype Edition. Whether you are hosting or joining a Yugma Skype meeting, you can easily invite a friend or colleague from your existing Skype contact list. Teaming up Skype with Yugma SE (For Skype) gives you all the tools needed to accomplish any task required in a traditional, face-to-face meeting.

With Yugma SE you get:

- No Yugma registration required - only a Skype Name is needed to use Yugma SE
- Free, unlimited online meetings for 1 host and up to 2 attendees
- Easy-to-use desktop and application sharing
- Share your desktop or any application with Windows, Mac or Linux users
- Secure and reliable

## Mac user instructions

The Yugma SE Installer will download and appear in the “**Downloads**” window.

Right click the Yugma SE-Installer and select “**Open**”.

If you see this window, please click the “**Open**” button to proceed.

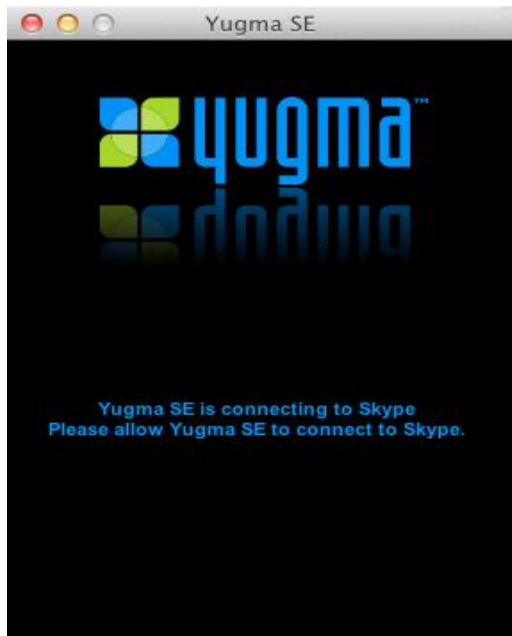

### Mac user instructions

The installer will launch and proceed to install the Yugma SE Skype App.

## Mac user instructions

During the installation, Yugma SE will attempt to connect to Skype. Please ensure the Skype application is running and you are logged in.

If you see this window, please select "Allow this application to use Skype".

## Mac user instructions

Next, you'll see the Yugma SE Meeting Welcome window.

In this screen you'll find:

**Skype Name** (confirming your Skype account availability)

**Host a Meeting** and **Join a Meeting** buttons to immediately start using Yugma SE

**Skype/Yugma sync up feature** – if you're a Yugma user and have a Yugma User ID, you can sync your account to Yugma SE

If you don't have a Yugma account (not required), you can **sign up** to enjoy all the instant web conferencing features of Yugma.

## Mac user instructions

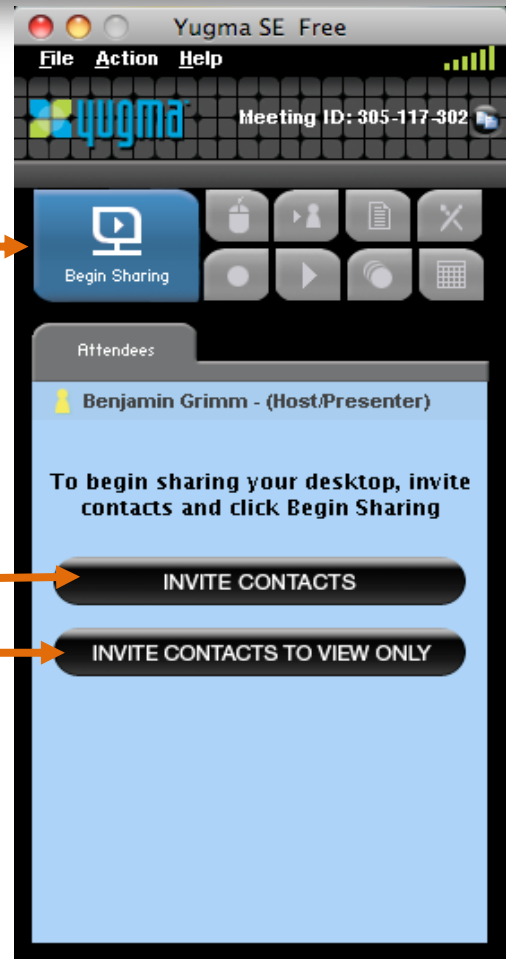

### Hosting a Meeting

After selecting “Host a Meeting”, Yugma SE will launch the Yugma control panel. Skype users that do not have a Yugma web conferencing account or have not synced Yugma SE to a Yugma account will have access the features associated with a Yugma Free Account (desktop sharing, invite up to 2 attendees, Windows & Mac compatible for Yugma SE attendees / Non Skype attendees can attend using standard Yugma or View Only Viewer).

To start sharing your desktop, click the “**Begin Sharing**” button

You can invite your attendees by clicking the buttons:

- “**Invite Contacts**”
- “**Invite Contacts To View Only**”

## Mac user instructions

### Hosting a Meeting

At the designated meeting time, your invited guests will join your meeting. When they arrive, you will see them in the attendee list.

Sync Yugma SE to a Yugma Pro account to access real-time collaboration features that include:

- Real-time collaboration with white board & annotation tools, mouse & keyboard sharing and instantly changing presenters.
- Record your webcast in order to share and playback at any time.
- Use the Shared File Space feature to distribute files securely.
- Live Technical Support.

Learn more about Yugma Pro at [www.yugma.com](http://www.yugma.com)

Mac user instructions

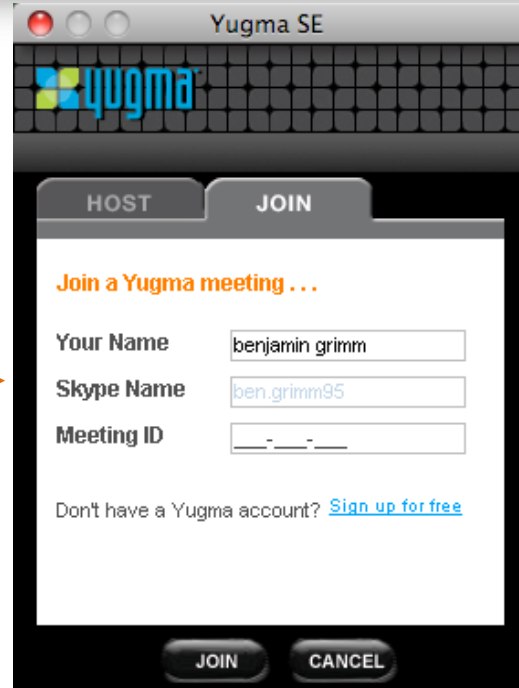

## Joining a Meeting

After selecting “Join a Meeting”, the Yugma SE control panel will launch.

Under the Join tab, you will see your Display Name, Skype Name and Meeting ID.

Enter your Meeting ID and click the Join button.

You will then enter into your meeting where you will see the meeting host and attendees under the “Attendees” tab.

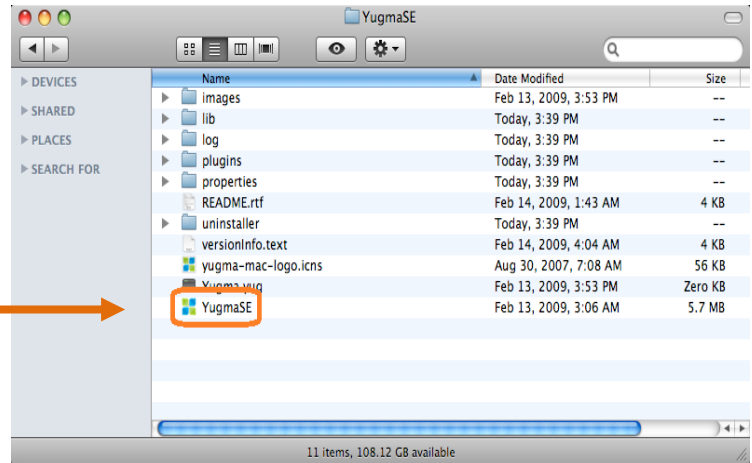

## Mac user instructions

### Accessing Yugma SE on Mac

You can quickly locate the Yugma SE folder on your Mac by entering “**Yugma SE**” in the Search box of the Finder tool.

Inside the Yugma SE folder, locate the Yugma SE icon (entitled “YugmaSE”) 

Click and drag the Yugma SE icon to the **Mac Dock** location to create file shortcut or alias.
